Learn about Japan Good Design BEST 100 Award-winning Design at Build4Asia Conference

(28 Apr 2016, Hong Kong) **Build4Asia Conference 2016** will be held on 4-5 May in conjunction with Build4Asia 2016 - Asia's Innovative Technology Showcase for the Building, Electrical Engineering and Security Industries at the Hong Kong Convention and Exhibition Centre to foster information exchange around Asia. The Conference has already received registration from over 150 professionals from Hong Kong, Macau, China and The Philippines etc.

Themed "Sustainable Architecture, Design, Building Services and Electrical Engineering", the Conference aims at promoting sustainable development. One of the highlights is Senior Architect, Architectural Services Department of the HKSAR Government Mr Thomas Wan will share secret of the Award-winning sustainable design - Shatin Community Green Station. Such design has proudly won the Good Design Best 100 Award, hosted by the Japan Institute for Design Promotion. (https://www.g-mark.org/award/describe/43016?locale=zh_TW)

Sha Tin Community Green Station, the first of its kind in Hong Kong, is a showcase for green design using shipping containers, as well as large windows and a high roof to minimize the usage of energy for lighting and air-conditioning. The station supports recycling efforts at the community level; and hold exhibition and educational programmes to advocate the importance of recycling. It consists of education centre, workshop, office and ancillary facilities. It has processed 100 tonnes recyclable materials in its first year of operation.

Other 18 speakers including Ms Annissa Wong, JP, Director of Environmental Protection Department, Ir Frank Chan, JP, Director of Electrical and Mechanical Services Department of the HKSAR Government and Mr Dominic Lam, Past President of Hong Kong Institute of Architects, etc. will be sharing topics like Low-Carbon Building Management, Waste Management and Recycling and EcoPark, Hong Kong. Building professionals must not miss this event, admission fee is only HK\$50. More information www.build4asia.com/events/build4asia-conference/.

Cost-saving technologies for buildings

Commercial buildings spend almost 40% of its total operating costs per year on electricity. A number of exhibitors at Build4Asia Tradeshow will showcase a wide-range of renewable energy, energy-saving solutions to help commercial and residential buildings, hotels and schools etc. to reduce operating costs to face the current economic challenges.

Asia's Innovative Technology Showcase for the Building, Electrical Engineering and Security Industries

4-6 MAY 2016 Hong Kong Convention and Exhibition Centre

The World's Most Efficient Ceiling Fan received 40+ international awards: present by Big Ass Fans (Booth no. 1C-108), their Haiku series is the winner of over 40 international design and technology awards. Made of sustainably harvested Moso bamboo or durable matrix composite, Haiku delivers silent air circulation evenly throughout the space in style and improves comfort. It is suitable for hotel, restaurant, office, mall, aviation and large residential area and is 80% more efficient than conventional ceiling fans.

Hong Kong Invention - wind and solar energy street lights: Robin Energy Ltd (Booth 1C-620) will showcase "Wind Arc" outdoor lighting system which is equipped with patented "Magnetic Resistance-free Generator" inventions plus efficient solar panels. The system is self-sustained with 8 hours collection of 1.5m/s wind plus sun light. The Hong Kong Convention and Exhibition Centre and the Sands Macao casino have already installed them and in operations.

Energy savings on air-conditioners and refrigerators invented by Hong Kong company : large architecture like shopping malls could spend over 40% of its electricity bill on air-conditioning. Coolnomix® is an energy saving devise for air-conditioners & refrigerators. It optimises the running-time of the compressor to minimise energy consumption which can deliver reductions on electricity bills of between 20 - 30% and enjoy return of investment in under one year. Hutchison Global Communications Limited, Hong Kong Ocean Park, CHI Residence, Helena May and Woodland Pre-Schools etc. have installed Coolnomix in their premises.

The biennial show Build4Asia will be held from 4 – 6 May at the Hong Kong Convention and Exhibition Centre, delivering a one-stop sourcing, networking and learning platform for the entire building, engineering and security industries, welcoming 15,000 Architects, Interiors Designers, Contractors, Developers, Engineers, Security System Integrators and Government Departments etc. to visit. 500 international brands and exhibitors will be showcasing a wide-range of products for building a smarter, saver city. Buyers can register for free badge at www.Build4Asia.com before 3 May.

About the Organiser

Since 1981, Hong Kong Exhibition Services Ltd. (HKES), one of the leading exhibition organisers in the Asia-Pacific region; and also a member of Allworld Exhibitions based in London, has been successfully organising numerous large-scale exhibitions in the region, including the HOFEX – food & hospitality tradeshow in Hong Kong and Electric and Power Vietnam – electrical & lighting tradeshow in Vietnam with comprehensive and professional services.
